

Dear Kirsten Conner Interior Design,

On behalf of the Seattle Design Center, we would like to congratulate you on your **First Place** win in the **Textile** category as part of the 16th Annual Northwest Design Awards.

NWDA received over 150 entries this year, making it a truly competitive year filled with spectacular, high-quality submissions. The judges were full of praise for your winning entry.

We invite you to return to the Seattle Design Center this summer as we undergo a significant renovation and refresh to the space. The new ownership is excited to showcase all of its new and existing showrooms, along with top-notch lines that you can't find anywhere else in the Pacific Northwest. It is our hope with your support that SDC will maintain its presence as the nucleus of the Northwest design community.

In lieu of the 2015 gala, Seattle Design Center has placed a full-page ad in *Gray Magazine's* June 2015 issue to recognize you and your peers as winners and true leaders in the Northwest design community.

Enclosed you will find your award, along with a copy of the ad that will be in the June issue of *Gray*.

We look forward to seeing you and your colleagues at SDC in 2015 and beyond. It is SDC's intention that it will be a place you, as a designer, will utilize for inspiration and design center that always remains consistent with high-end, curated products from some of the best showrooms in the Northwest carrying top national and international home lines. Also, look out for an ongoing roster of design-oriented events to serve designers such as yourself and the clients you serve.

Cheers to you, your team and continuing leadership in Northwest design.

Congratulations,

The Seattle Design Center

About the 16th Annual Northwest Design Awards

The Northwest Design Awards is an annual competition where designers, architects and students across the Pacific Northwest submit projects into 15 competition categories. A panel of West Coast industry experts evaluates the submissions through an anonymous process that measures each project on proportion, composition, use of space, materials and appropriateness of the design solution.
